WORK EXPERIENCE

ATT Group, ATT Infosoft Pte Ltd

October 2025 - March 2026

Assistant IT Engineer • Full-time

- Resolved system faults via hotline and onsite support, meeting SLA targets and maintaining system reliability.
- Provided roaming support across client sites, coordinating repairs and supporting 24/7 standby operations.

Building Construction Authority (BCA)

November 2024 - November 2025

Executive, Data Analyst • Full-time

- Delivered agency-wide workforce analytics through cloud-based Power BI dashboards, enabling firm-level and sector-wide insights.
- Managed end-to-end survey operations and data processing, including automation, dataset transformation, and insights generation for cross-agency taskforces (e.g., CAW regulations, SkillsFuture).

Central Provident Fund Board (CPFBoard)

June 2024 - September 2024

UAT Tester • Full-time

- Authored end-to-end test plans for new survey releases; validated CAPI workflows, stress-tested data capture, and escalated the defects.
- Coordinated with data analysts and survey operations to align testing outcomes with field requirements.

Ministry of Manpower (MOM)

February 2020 - July 2020

Information Technology Officer • Full-time

- Offered a full-time officer role post-internship for reliability and performance, continuing RPA development and COVID-19 support.

Government Technology Agency (GovTech)

July 2019 - February 2020

Software Engineer • Internship

- Developed UiPath RPA automations (e.g., SG Work Pass migration, batch scripts), improving service centre efficiency and earning a testimonial.
- Managed UiPath licensing, UAT, IT clinic support, and training content; developed automation scripts for blockchain initiatives.

NCS Pte Ltd

May 2016 - December 2016

Desktop Support Engineer • Internship

- Delivered onsite support, application troubleshooting, and inventory management; received recognition awards for top performance.

PROJECTS

Personal Website | haziqtech.sg

Developed and deployed a personal portfolio with custom domain and DNS/hosting configuration, featuring project showcase, blog, designed as a sandbox for implementing future features such as SQL database, analytics, and interactive modules.

CEH Study Site | haziqachik.github.io/ceh-pages

Built an interactive study platform on GitHub Pages using HTML/CSS/JavaScript with tabbed notes, theme presets, and responsive UI.
